

Directions for Use – Spot Applications

Spot Applications (Spot Treatments)

In cool situations or for tough to kill weeds, a more concentrated spray may be needed. In such situations, spot treatments with a 20% dilution rate of AvengerAG® Burndown Herbicide, a ratio of 1 part AvengerAG® Burndown Herbicide into 4 parts of water may be used up to one (1) week before harvest (see Table 2). Do not exceed 8½ gallons of AvengerAG® Burndown Herbicide per acre per application.

Table 2 - Spot Application: Mixing Rates for 1:4 Dilution

Final Spray Volume	Amount of AvengerAG® Burndown Herbicide 1:6 ratio (14% dilution rate)*
1 Gal	26 Fl oz
60 Gal	12 Gal
100 Gal	20 Gal

**Percent AvengerAG Burndown Herbicide in water. (Equivalent to 11% d-limonene active ingredient in water.)*
